THE BUSINESS CHALLENGE

# Daily operations shouldn't depend on spreadsheets and memory.

As a trading business grows, information spreads across notebooks, files and people. Rasqora keeps it in one place, so the whole team works from the same records.

CHALLENGE

**Product and customer information is scattered**

### One list of products, customers and suppliers

Every product carries its code, barcode, unit, category and three price levels. Customers and suppliers have their own codes, credit limits, balances and statements.

CHALLENGE

**Preparing invoices takes too long**

### Invoices in a few keystrokes

Type an item code and press Enter. VAT, totals and change due are worked out for you, ready to print as an A4 tax invoice or an 80 mm counter receipt.

CHALLENGE

**Purchases and sales are hard to follow**

### Every step is linked and listed

Purchase orders, goods received, supplier bills, invoices and payments connect to each other, and registers show them by date, product, customer or supplier.

CHALLENGE

**Business records live in different places**

### One transaction updates everything it touches

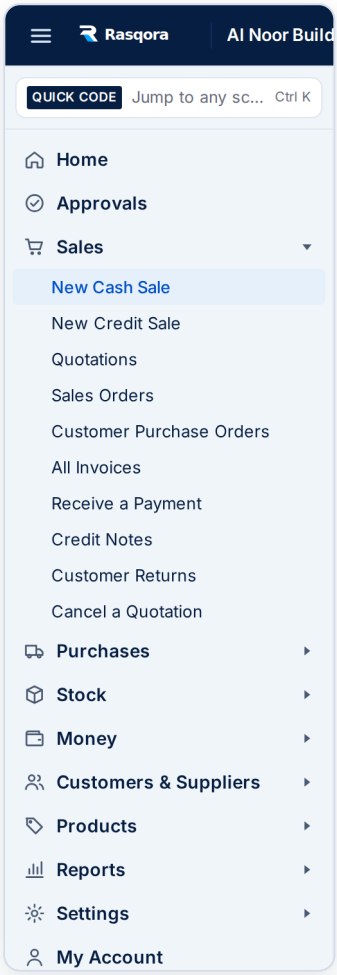

Recording a sale or a purchase updates stock, customer or supplier balances and the accounts together — the journal entries are created automatically.

CHALLENGE

**Little visibility into the day's business**

### The day at a glance

The home screen shows today's sales, purchases, expenses, money received and paid, what customers owe, what you owe suppliers, stock value and items running low.

The menu is organized around everyday work: Sales, Purchases, Stock, Money, Customers & Suppliers, Products, Reports and Settings.

## From the first quotation to the last payment — one organized system.

Screens shown throughout this brochure are from the working application, using fictional demo data.

ONE SYSTEM FOR EVERYDAY OPERATIONS

# Everything a trading business runs on, connected.

Each area feeds the others: a sale reduces stock and adds to what the customer owes.

## Sales & invoicing

- Cash sales with change due, and credit sales
- Quotations, sales orders and customer purchase orders
- Bilingual A4 tax invoices and 80 mm receipts
- Payments, returns and credit notes

## Purchasing

- Purchase orders with approval and printed LPO
- Goods received against the order
- Supplier bills, supplier payments and returns
- Record a cash or credit purchase in one step

## Stock & warehouses

- Stock on hand per warehouse, valued at average cost
- Transfers between warehouses and count adjustments
- Damaged or expired write-offs and recoveries
- Stock history, running-low and out-of-stock lists

## Money & accounts

- Cash and bank accounts with cash book and bank book
- Expenses and other income, with receipts attached
- Close the day: cash in, out and closing balance
- Automatic journal entries and chart of accounts

## Customers & suppliers

- Credit limits and credit days, checked on every credit sale
- Opening balances and running statements
- Who owes us and what we owe, by age
- Salespeople linked to sales

## Reports & UAE VAT

- 39 reports, each printable as PDF and exportable to CSV
- Sales, purchases, stock, balances and daily summaries
- VAT on sales and purchases, daily and yearly
- Profit & loss, balance sheet and trial balance

## Products

- Codes, barcodes, units, categories and brands
- Three price levels (A, B and C) and a minimum price
- Standard, zero-rated, exempt and out-of-scope VAT
- Ready-made product catalog to import from

## Team & control

- Users with ready-made roles and custom roles
- Approval rules for discounts, write-offs and more
- Several shops, branches and warehouses
- Activity log and 2-step sign-in

LIVE **Everything above is in the current system.**

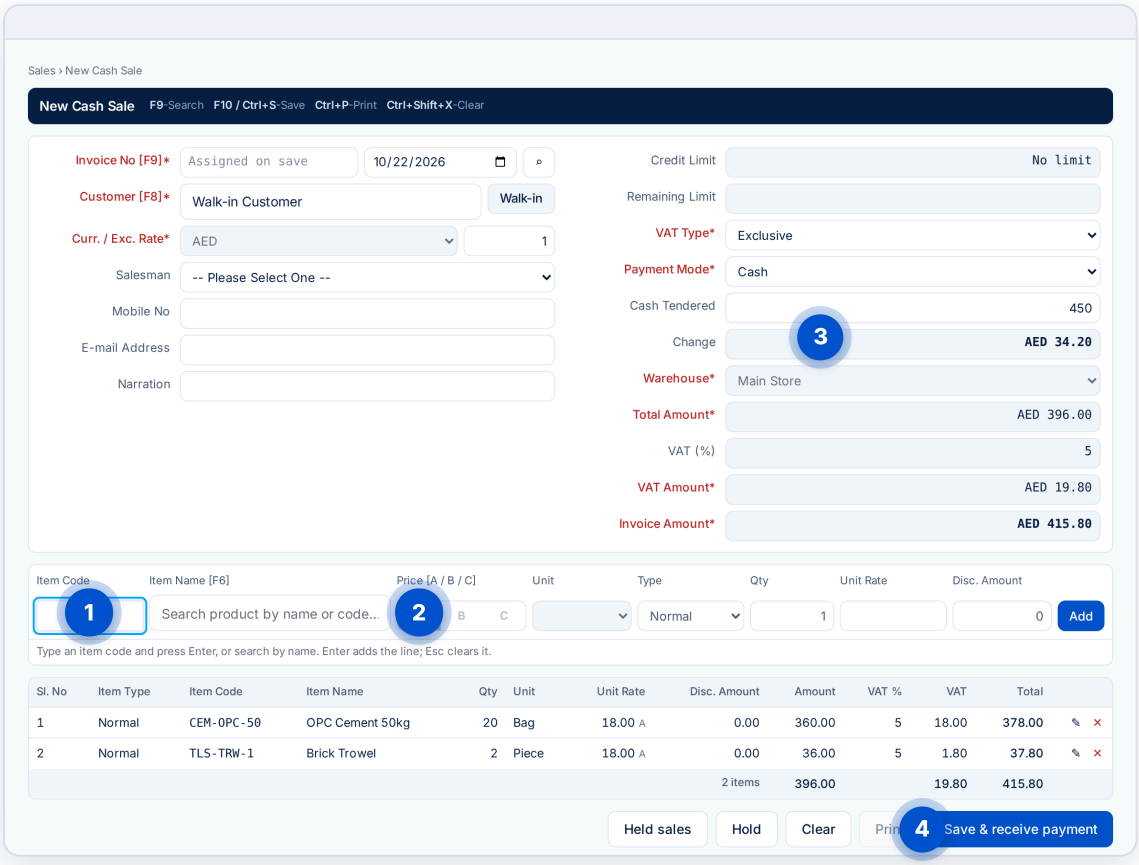

PLANNED **Not yet available:**

- Emailing invoices and statements to customers
- Submitting e-invoices to the FTA through an accredited provider (documents are prepared today)
- Online payment for subscriptions
- Arabic translation of every screen (menus, headings and printed invoices are bilingual today)
- Currencies other than AED
- A dedicated mobile app (Rasqora runs in the phone's browser today)

SALES & INVOICING

# Make everyday sales easier to manage.

A counter sale takes a few keystrokes: choose the customer, type the item code, enter the quantity, take the cash. Rasqora checks stock, applies the price level and VAT, and works out the change.

**1 Item code or search**
Type a code and press Enter, or search by name or barcode.

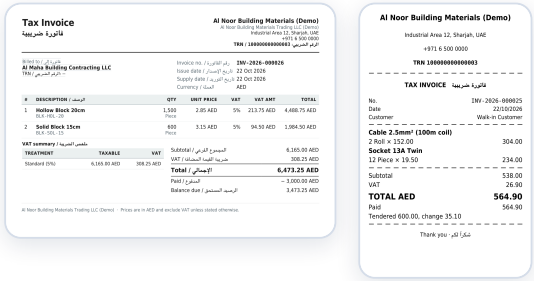

**2 Price levels**
Switch between price A, B and C per line.

**3 Change due**
Cash tendered and change are calculated as you type.

**4 Save, receive, print**
One step posts the sale and the payment; print the receipt.

## What the sales team can do

- Cash sales to walk-in customers
- Credit sales checked against the customer's limit
- Quotations, printable and convertible to a sale
- Sales orders that reserve stock
- Record customers' own purchase orders
- Free-of-charge lines and line discounts
- Hold a sale and resume it later
- Receive full or part payments
- Customer returns and credit notes
- Keyboard shortcuts for faster entry

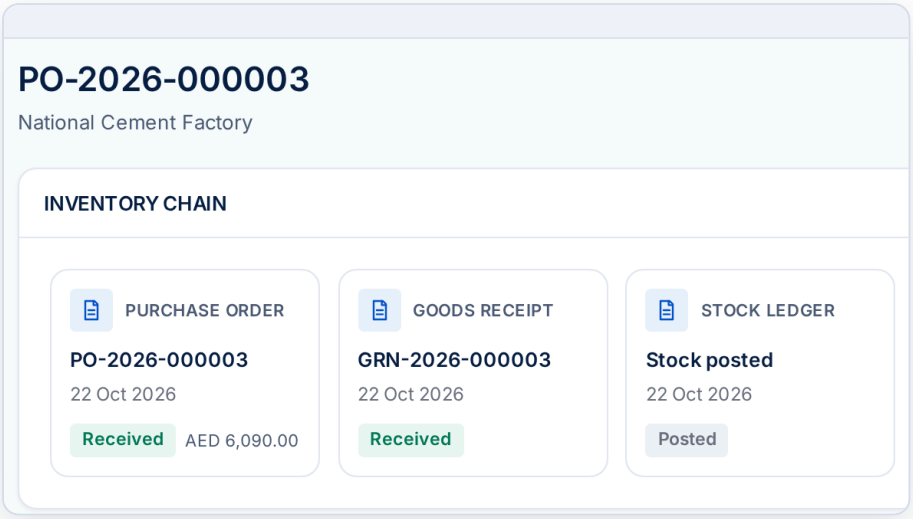

Printed documents: bilingual tax invoice with VAT summary and TRN, and an 80 mm counter receipt.

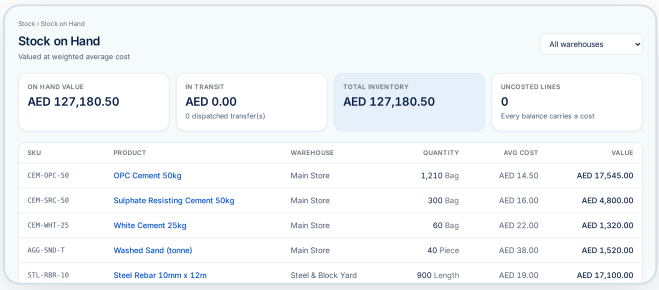

PURCHASING & INVENTORY

# Know what you ordered, what arrived and what is on the shelf.

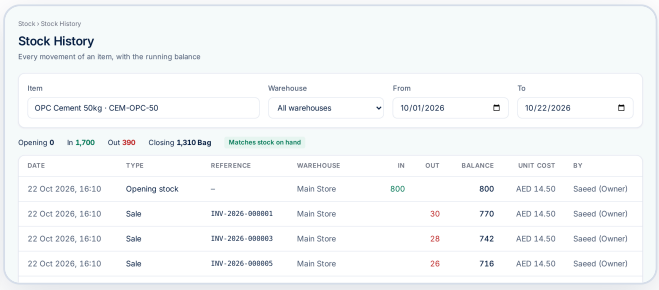

A purchase order follows a clear path — approval, goods received, stock posted — and every step is visible on the order itself.

A purchase order with its chain: the order, the goods receipt and the stock it posted.

Stock on hand by warehouse, with value at average cost.

Stock history: every movement of an item with its running balance.

## Purchasing

- Purchase orders: draft, submit, approve, print as LPO
- Goods received against the order, part or full
- Record a cash or credit purchase in one step
- Supplier bills and payments, with what you owe
- Returns to supplier and cash purchase refunds

## Inventory

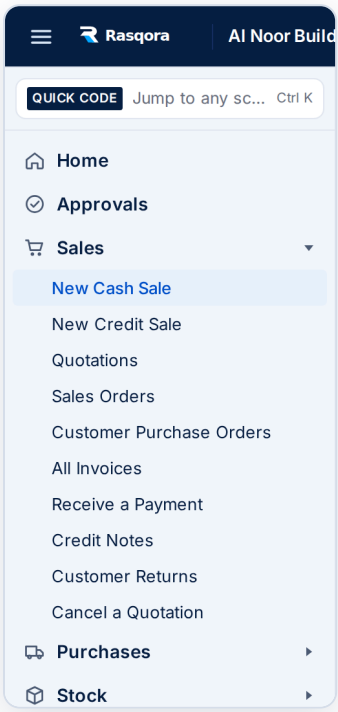

- Stock per warehouse, valued at weighted average cost
- Transfers between warehouses: approve, dispatch, receive
- Count adjustments with a reason for every change
- Damaged or expired stock written off, and recovered
- Running-low and out-of-stock lists from reorder levels

**Stock moves only through recorded documents** — sales, purchases, transfers, adjustments and write-offs — so every quantity on hand can be traced back to the transaction that changed it.

DESIGNED FOR PRACTICAL BUSINESS USE

# Clear screens for the people who use them every day.

Rasqora is written for shop owners, counter staff and store keepers — not only for accountants. Screens are named after the job they do, and the fastest path is always a few keys away.

Plain names: "New Cash Sale", "Pay a Supplier", "Who Owes Us".

### Clear, organized workflows

The menu follows a working day — sell, buy, stock, money — with one group open at a time.

### Jump to any screen

Press Ctrl K and type a screen name or short code to go straight there, or a document number to open it.

### Consistent transaction entry

Sales, quotations and purchases share the same layout and keyboard shortcuts: F9 search, Ctrl S save, Ctrl P print.

### Each person sees their part

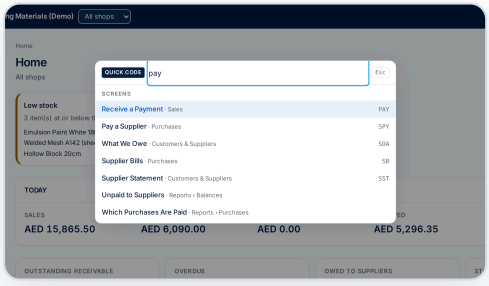

Ten ready-made roles — from cashier to accountant — show each person only the screens their job needs.

### English and Arabic

Switch to Arabic with right-to-left layout. Menus, headings and printed invoices are bilingual today.

### In the browser, on the counter or the phone

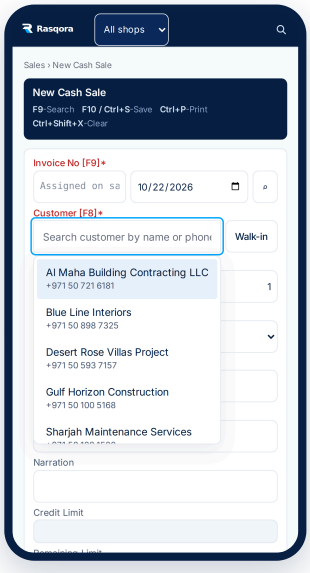

Nothing to install. Rasqora runs in a web browser on desktop, and key screens such as a cash sale also work on a phone.

Quick Code: type "pay" to find every payment screen.

The home screen in Arabic, right to left.

A cash sale on a phone.

WHY RASQORA

# A structured foundation for a growing trading business.

01

### A centralized approach to operations

Sales, purchasing, stock, money and reports share one set of records instead of separate files.

02

### Organized sales and purchasing workflows

From quotation to payment and from purchase order to supplier payment, each step follows the last.

03

### A consistent way to manage records

Customers, suppliers and products have codes, balances and statements you can review any time.

04

### Built around trading-business needs

Price levels, credit limits, warehouses, receipts and UAE VAT are part of the system, not add-ons.

05

### Reports when you need them

39 reports — daily sales, VAT, balances, stock and profit — printable as PDF or exported to a spreadsheet.

06

### Room to grow

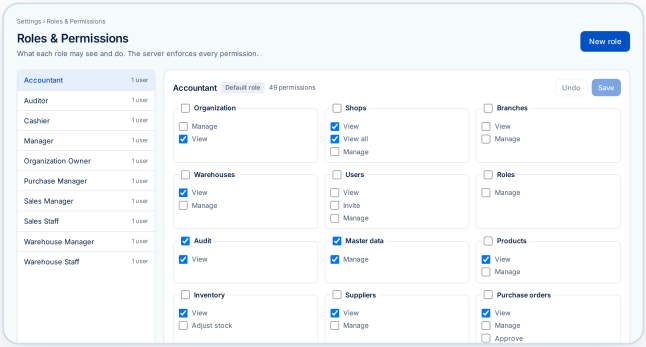

Add shops, branches, warehouses and staff as the business grows, each with the access they need.

## Control and accountability

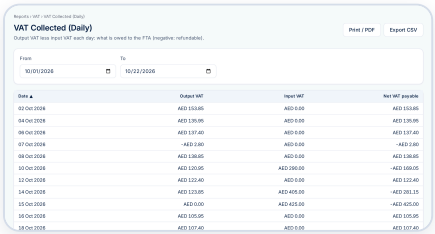

- Roles and permissions: ten ready-made roles, plus your own
- Approval rules for large discounts, credit-limit overrides, stock adjustments, write-offs, cancellations and expenses
- Staff see only the shops they are assigned to
- An activity log of important changes — who did what, and when
- Optional 2-step sign-in with an authenticator app
- Posted documents are corrected by reversal, never silently edited

## Numbers you can review

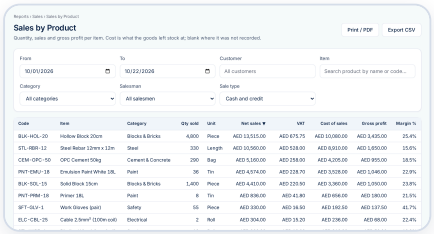

Every report starts from the same recorded transactions, so the VAT figures, customer balances and stock values agree with each other.

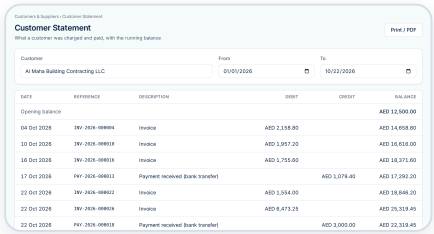

Roles & permissions: choose exactly what each role may see and do.

VAT collected, by day.

Sales by product, with cost and margin.

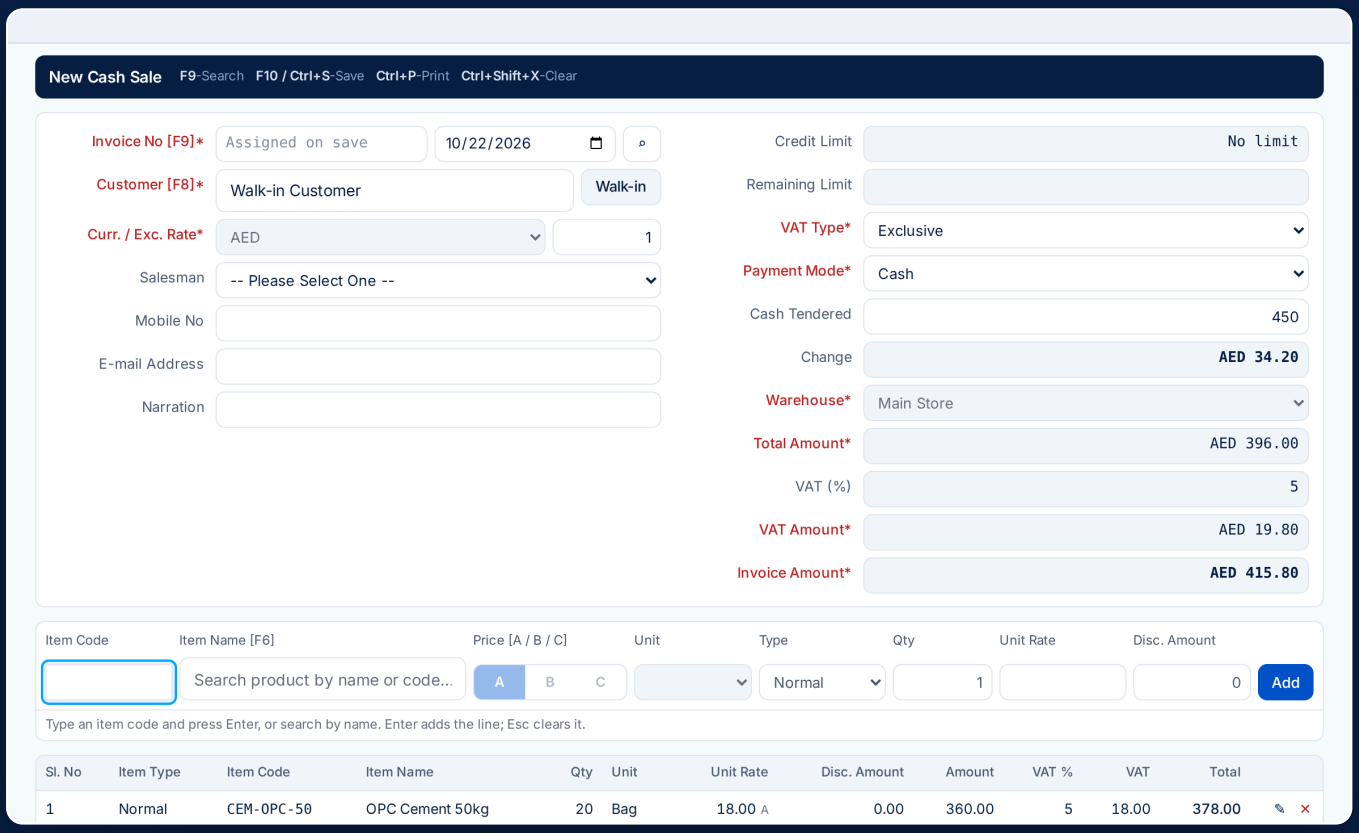

Customer statement with running balance.

Rasqora
BUSINESS MANAGEMENT SYSTEM

# Bring More Clarity to Your Business with Rasqora ERP.

Sales, purchasing, stock, money and reports in one organized system — for trading, wholesale and retail businesses that want every transaction recorded once and visible everywhere it matters.
